TEL: (709) 646-2600 : FAX: (709) 646-2065

PAVING DRIVEWAY

Permission must be obtained from the Town of Stephenville Crossing in order to pave a Driveway.

Once your application to pave your driveway has been approved by the town; the following conditions must be met.

1. Surface of pavement must be crowned so the water will flow off to sides and not onto road way.
2. The edges of the pavement between your fence and the street must be buried at an angle so that the outer edge is approximately 10 inches below the surface of the street, this will eliminate damage to your driveway during snow clearing operations when the ground is not frozen.
3. Permit is only good for the day of paving.
